

THE KETCHUP

APRIL 10TH 2015 MEETING

Capt. James J. McKinstry Chapter IPMS/USA
Friday, April 10 – 2nd Floor, Hedricksen Room
Arlington Heights Library Meeting starts at 7:30 PM

Meeting theme for April: NUKE NITE Anything nuclear

Program: Applying lozenge decals ~ by Charles Scardon

THIS is our 44th year as an IPMS/USA Chapter

Club Officers

Norris Graser	President	Dan Paulien	Vice Pres./Program
Mike Hanlon	Secretary/Treasurer	Paul Gasiorowski	Chapter Contact
The <i>Tick</i>	Newsletter Editor		

While show n tell was fine, the theme only produced four models for NUKE NITE. They were: B-52 stratofortress, 1/72nd scale Monogram built by John Koziol; A-4E Skyhawk, 1/48th Scale, Hasegawa built by Ed Mate; F-89J Scorpion, 1/72nd scale, Academy by Dan Paulien; F2H-1 (although I believe it was the F2H-2 hat was the 1st Banshee capable of carrying a nuke) Model by Carl Geiger

Continuing WW I aircraft programs, in anticipation of the May WW I theme night, Charlie Scardon presented a demo on applying lozenge decals. He had everyone's attention – especially concerning his unusual way of using Future Acrylic when applying decals.

SHOW AND TELL

F-89J by Dan Paulien 1/72, Academy built OOB, Gloss Aircraft Gray finish. Iowa ANG markings.

F-89J Scorpion all weather interceptor. Weapons included air to air Genie missile

F2H-1 Banshee by Carl Geiger. This is the ancient 1/48th Hawk kit. Markings: NAS

Glenview training squadron. If you are familiar with the kit, you will appreciate the work that went into it.

Oct 1944 Eduard Photo Etch, Master Model guns barrels, MMaster/Aeromaster paint SuperScale Decals Model by Ed Mate

P-47D-15-RE Thunderbolt, 1/48th Scale, Tamiya, Rising Decals. MMaster and Floquil Paint

Markings are for Wicked Wabbit Lt J.C. Hare, 65thFS/57thFG 1944 Alto Corica Model by Ed Mate

Me-109G4 in Italian Markings. 1/32nd scale by Scott Olsen

B-52D 1/72nd scale Moniogram by John Koziol

USS Greenville, 1/700th scale Hobby Boss.
Model master Acryl paint by Paul Gasiorowski

Some Bipes by Charlie Scardon.

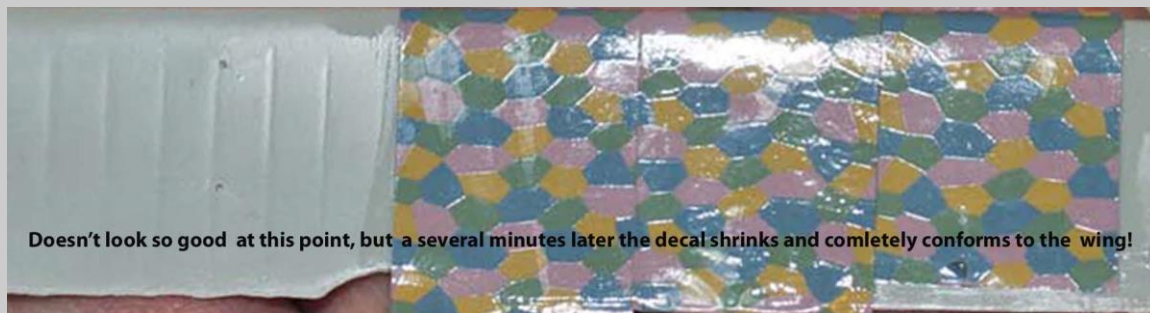

APRIL PROGRAM

If members liked the March program on building wood props by Charlie Scardon, then the group was in for a pleasant surprise when he demo'd his application technique for lozenge pattern decals. Charlie explained how and where to cut lozenge before applying to the models. There is more behind it than you would think! He also used his rather different technique for applying decals by dipping them in Future Floor Acrylic instead of the traditional method of preparing the surface with gloss, letting it dry and then applying in the standard manner using water. Two very useful programs in a row from Charlie.

Applying cut lozenge pattern and applying to bare plastic wing by dipping the decals in Future Floor Acrylic

Doesn't look so good at this point, but a several minutes later the decal shrinks and completely conforms to the wing!

Blenheim Mki nose converted to car. Model project for Lygiros??

So much for AprilThe Tick
