NOVEMBER 2016 MEETING

MEETING NOTES

There were not so many members at the November meeting so we had some extra time. After the business part of the meeting was finished, we discussed many subjects "stuff" like Mike Hanlon's tanning salon visits and the annual Butch O'hare contest. It appears the contest rules have changed up over the years. The *Tick* mentioned he would try to get a set of the rules via Bill Soppe but of course that likely wont happen because the *Tick* always has "other stuff" on his mind...

Since there was plenty of time, Mike Hanlon tried to use as much of the evening as he could to talk about his current build knowing full well that he had a longer leash than usual. Yes, he really pushed it to the point Charlie indicated he couldn't handle it anymore. He went on and...on .. and...on...

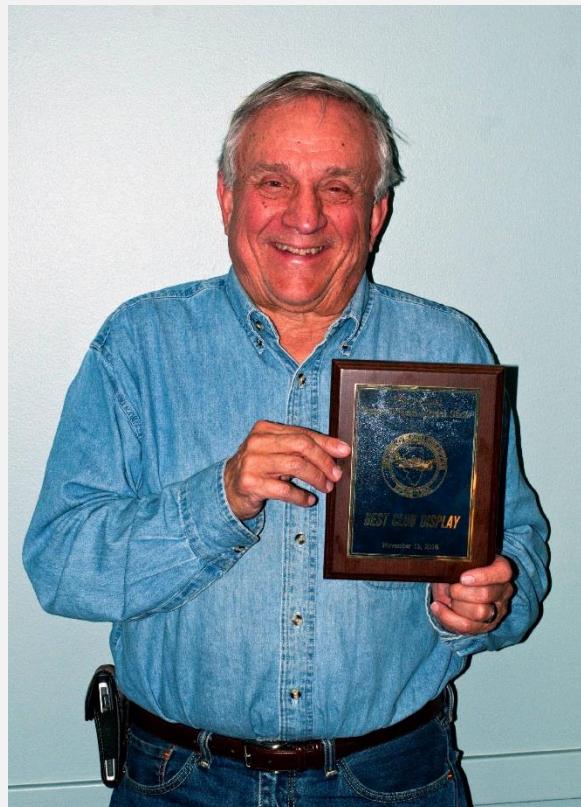

Charlie Exhausted, took a nap... and Hanlon continued to drone on ... Droning on ... extoling how great his craftsmanship has become and the virtues of the kit itself...

One of the guys had a tube of lipstick so ... like who knew the *Tick* was an artist? WE WON'T identify what member was thoughtful enough to have lipstick but Charlie is grateful that it wasn't a Sharpie

BUTCH O'HARE AWARD After Hanlon ran out of words.. Discussion turned to the display table McKinstry had for the annual O'Hare show. Our club was deemed to have the best display and rewarded with the Butch O'Hare "Best Club Display 2016 Award." For his time and energy organizing this project, the McMembership presented the plaque to Paul Gasiorowski.. WELL done, Paul!

Those who loaded the table (and behind it) included James Batchelder, Paul Gasiorowski, Carl Geiger,

Mike Hanlon, Steve Kumamoto, ,Ed mate, Dan Paulien, frank Ress, Charlie Scardon, and the *7icks*

LIBRARY DISPLAY

IPMS McKinstry put up our annual display at the library. This time around, the theme was Pearl Harbor. Included were models of aircraft and ships present plus several books, a map and other information describing the attack.

Thanks to the club members who provided items and helped set up the display: Brian Gardner, Paul Gasiorowski, Steve Kumamoto, Frank Ress, Charlie Scardon,

MODELS FOR THE VA

Paul Gasiorowski collected models and supplies for distribution to Hines VA Hospital, Maywood, IL. and the Lovell VA Administration, Naval Station Great Lakes. In all, Paul delivered over 60 kits to each plus modeling supplies. I don't have a complete list of those who donated, but did include Brian Gardner, Paul, Steve Kumamoto and Frank Ress.

NOVEMBER MODELS

Norris Graser

1/48th scale Tamiya A-1H Skyraider

Model Master 34079 Green, 30219 Tan, 36622. Gunze 34102 green. AeroMaster Decals for **SPAD**. DAD ~ CO's a/c 6 SOS..

Steve Kumamoto

1/72nd scale Hasegawa F-86D

Built out of the box with MicroScale decals. Overall Floquil Silver. Markings are for F-86D-45 4th FIS at Misawa.

Mike Hanlon

Italeri paints: dark earth, Middlestone and Azure Blue. Mike used AeroMaster Decals for an aircraft based at Malta,

Steve Kumamoto

1/72nd scale Monogram F-82G Twin Mustang

68th FS. Markings represent the 1st air to air kill during the Korean War, downing a YAK 11. The 1st 3 enemy a/c shot down in the Korean War were by 68th FS F-82's.

Charlie Scardon

1/72nd scale Hobbycraft Sea Fury

Gunze Sangyo paint. Kit decals. Phot etched metal included in the kit for antenna, cockpit details and seatbelts

Charlie Scardon

1/72nd scale Minicraft PB4Y-1

Built out of the box and in post war reserve markings for San Diego. Decals were from a variety of Superscale sheets. See Charlie's kit review in this issue of the newsletter.

PB4Y-1 Liberator 1/72nd scale

by Charles Scardon

The Minicraft PB4Y-1 kit has been around for some time now and is one of five versions they offer. It was the best B-24 available until the advent of the Hasegawa kit. Minicraft tooled up 5 different nose sections to give the modeler the many options. Other than that, the remaining parts are the same.

What is a PB4Y-1? It is any type of Liberator the navy used regardless of US Army designation. Except for one aircraft (42-78271) all were built by Consolidated at their San Diego plant.

The kit is molded in light grey and clear plastic. The moldings are crisp with only one exception. One propeller hub lacks the detail of the others. I think they failed to finish that one. The other downfalls of the kit are the slightly undersized and tapered engine cowlings, an extra panel line running the entire length of the aft fuselage halves, and the rear turret has a seam running through the glass. At some point, the thrust line was interpreted as a panel line. It is an easy fix to fill it with .010 rod and MEK. Sand it smooth and re-scribe the vertical lines. The cowlings are tougher. Short of replacing them I do not have a repair for them. A company called Ron's Resin use to make cowls for the kit. I purchased a set and discovered the size problem everyone was having a cow about is not really all that much. But that is modelers. On a built up kit, it is not really that noticeable. Like the 1/48 Monogram B-24 the rear turret has a seam through the Plexiglas. Squadron makes replacement canopy sets for this. The rear turret is a A6A, Squadron B-24D canopy set has the required part. I decided to make a post war reserve plane from San Diego in the Arctic markings. The post war planes had enclosed waist guns. I cut the opening so it was a rectangle. The gun mounts were made out of round rod and the glass was plastic from a Dannon yogurt container.

I used the Squadron canopies. I used my tried and true method of pouring Hydrocal 105 into the cavity to reinforce the plastic while I cut them out. The parts were painted before they were cut out. I used Model Master Gloss Sea Blue, for the main coat. The red areas were first painted white and then given a coat of Insignia Red. I had to cobble together decals from a variety of old Super Scale sheets. Good luck with that now, they are very hard to find.

Overall it is a good kit. It has a lot of potential. I have found at least ten different ways to paint them just for operational aircraft. There are a number ways to paint up hacks, also.

48-005 Type 4 national Insignia and data Decals Pt1 for the P-47 Thunderbolt

Besides enough insignia to do 9 complete aircraft in multiple configurations, there is plenty of excess data that you won't find on most decal sheets, either in the "box" or as aftermarket. Below are a few examples.

PROP DATA

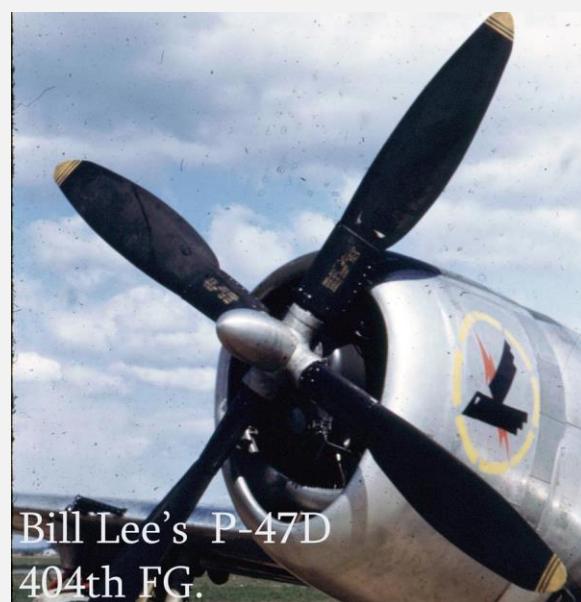

Factory configuration P-47 blades were lo luster or flat black with 4 inch Insignia Yellow tips. Use black and yellow single stripes for the Aero Products 12' 2" blades. A.O. Smith 12' 2" Asymmetrical blades, use black and yellow double stripes. Check your references for variations.

Featured are 6 different blade types + an extra 13' Symmetrical with different data presentation.

There are enough blade specific decals to do 4 sets of each type. Plenty of accurate Curtiss Electric logo's and plenty of spare Hamilton Standard logo's using gold ink background that makes them stand out.

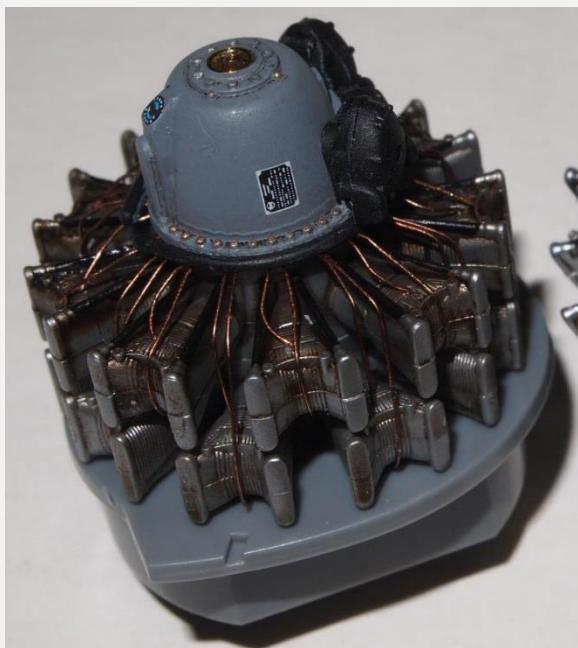

12'2" A.O. Smith Asymmetrical blades complete with fine, twin prop tip stripes

Bill Lee's P-47D
404th FG.

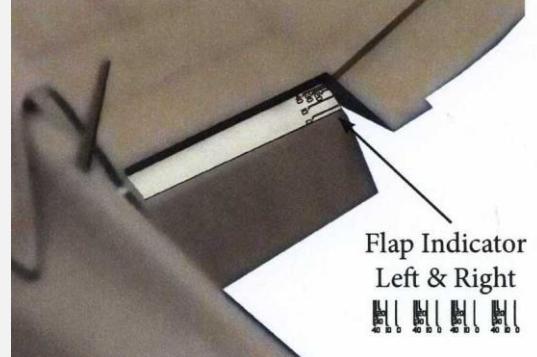

Hamilton Standard 13' diameter blades utilizing the most common white data. The image doesn't do justice to the logo.

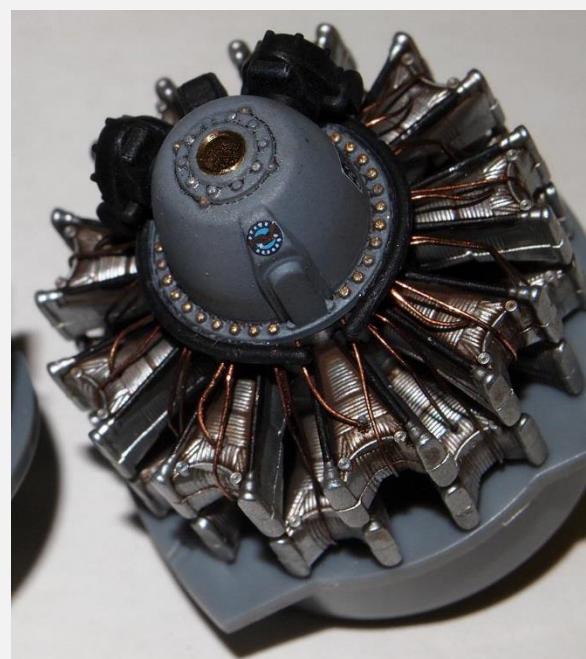

A pair of well-done and wired Tamiya engines by Ed Mate.

ALSO on this 2 decal set release are 2 different types of landing gear hydraulic data plates, wing gun numbers and red wing root NO STEPs. This decal set and other ThunderCal releases, can be purchased at Thundercals@yahoo.com 48005, a 2 decal set \$22.00ea. Dealer inquiries welcome

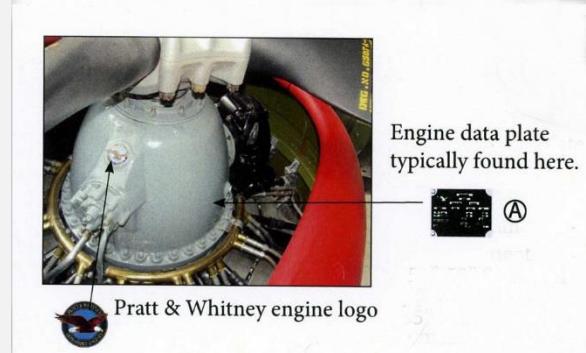

There are 8 sets of flap indicators. These are particularly useful for the Tamiya P-47 series as the kit allows for lowered flaps.

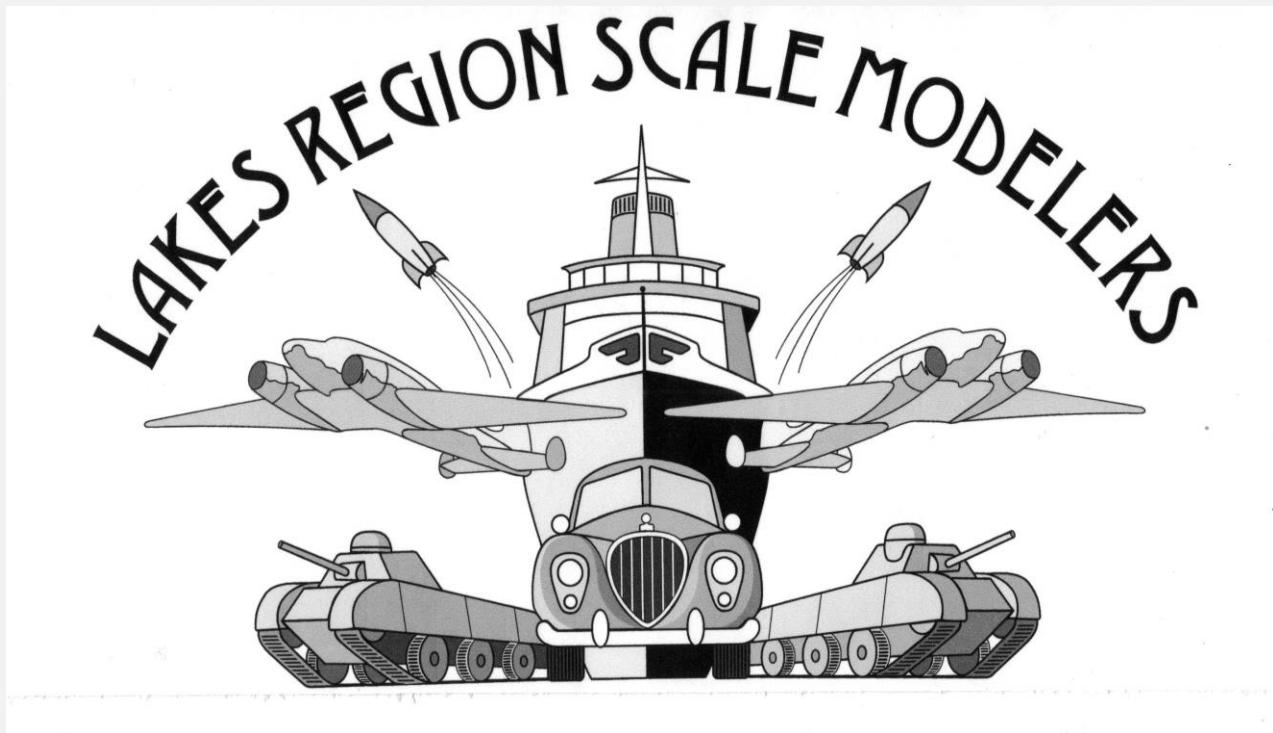

Flap indicator decals are not included on the kit decals

Final touches are the P&W engine data plate And Pratt & Whitney logo decals.

NIMCON 6

(Sixth Annual Northern Illinois Model Contest)

Saturday, May 20, 2017 9:00AM to 5:00PM

McHenry County College, Crystal Lake, Illinois

**Home of the 2017 IPMS R5
